

Jenkins, Makefiles && Docker

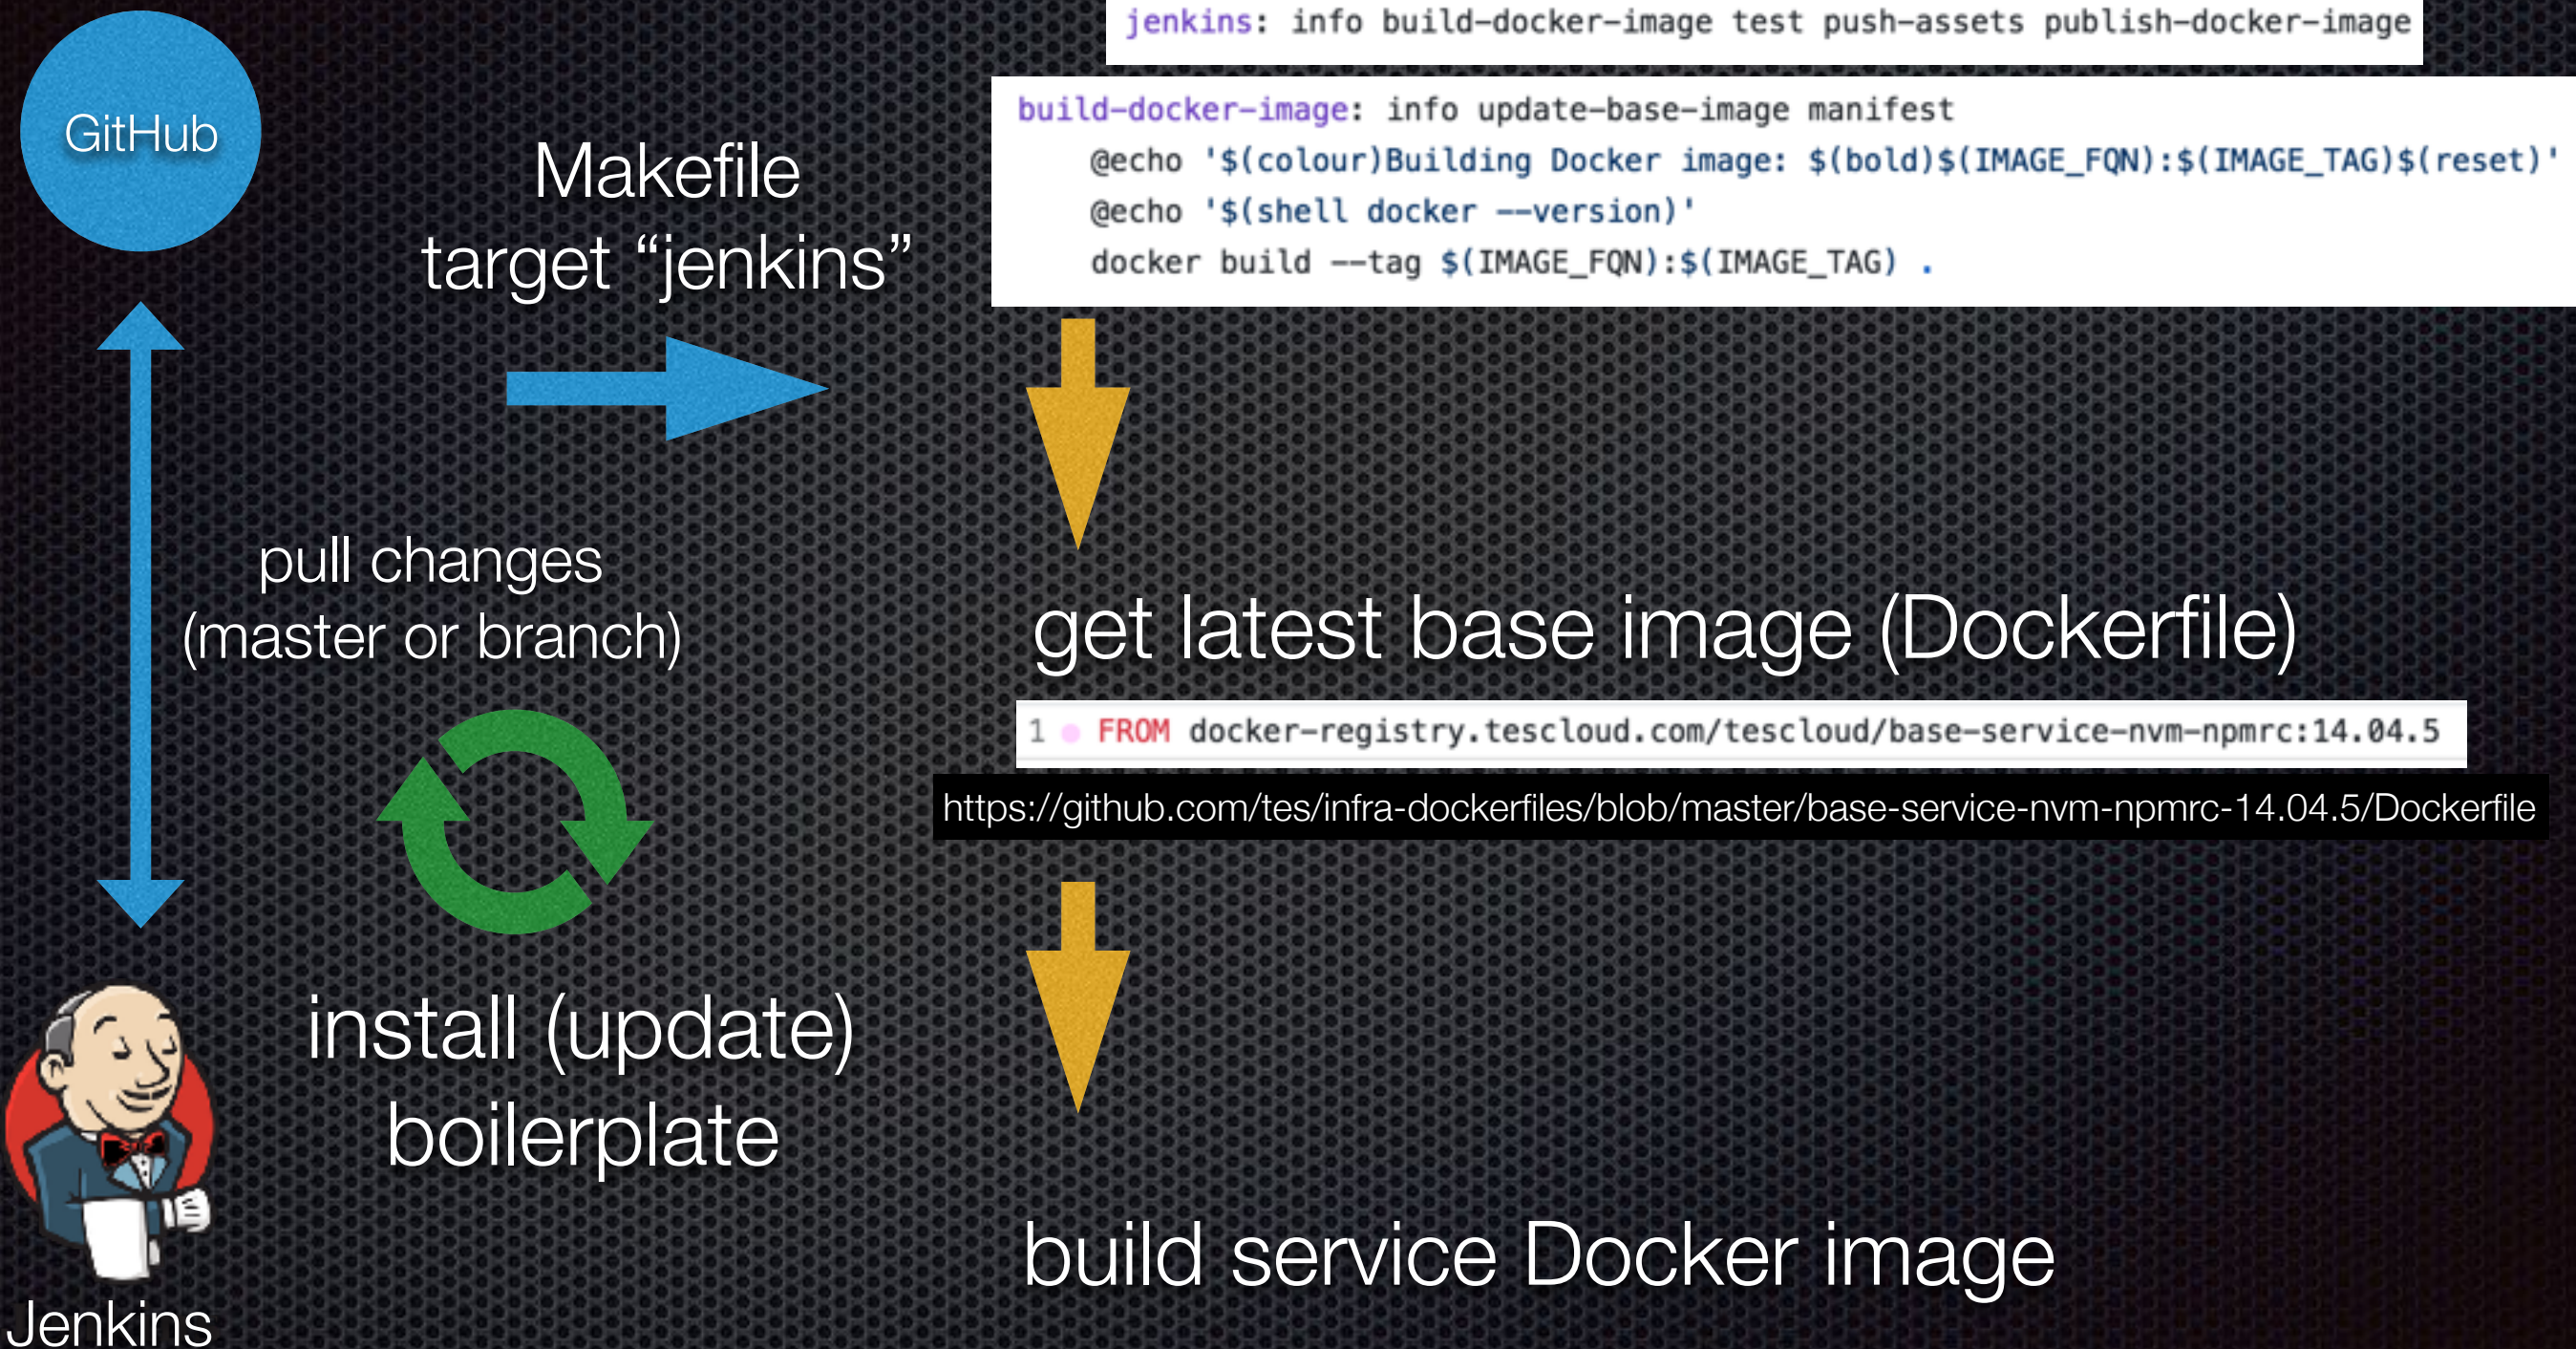

# The long journey of git push

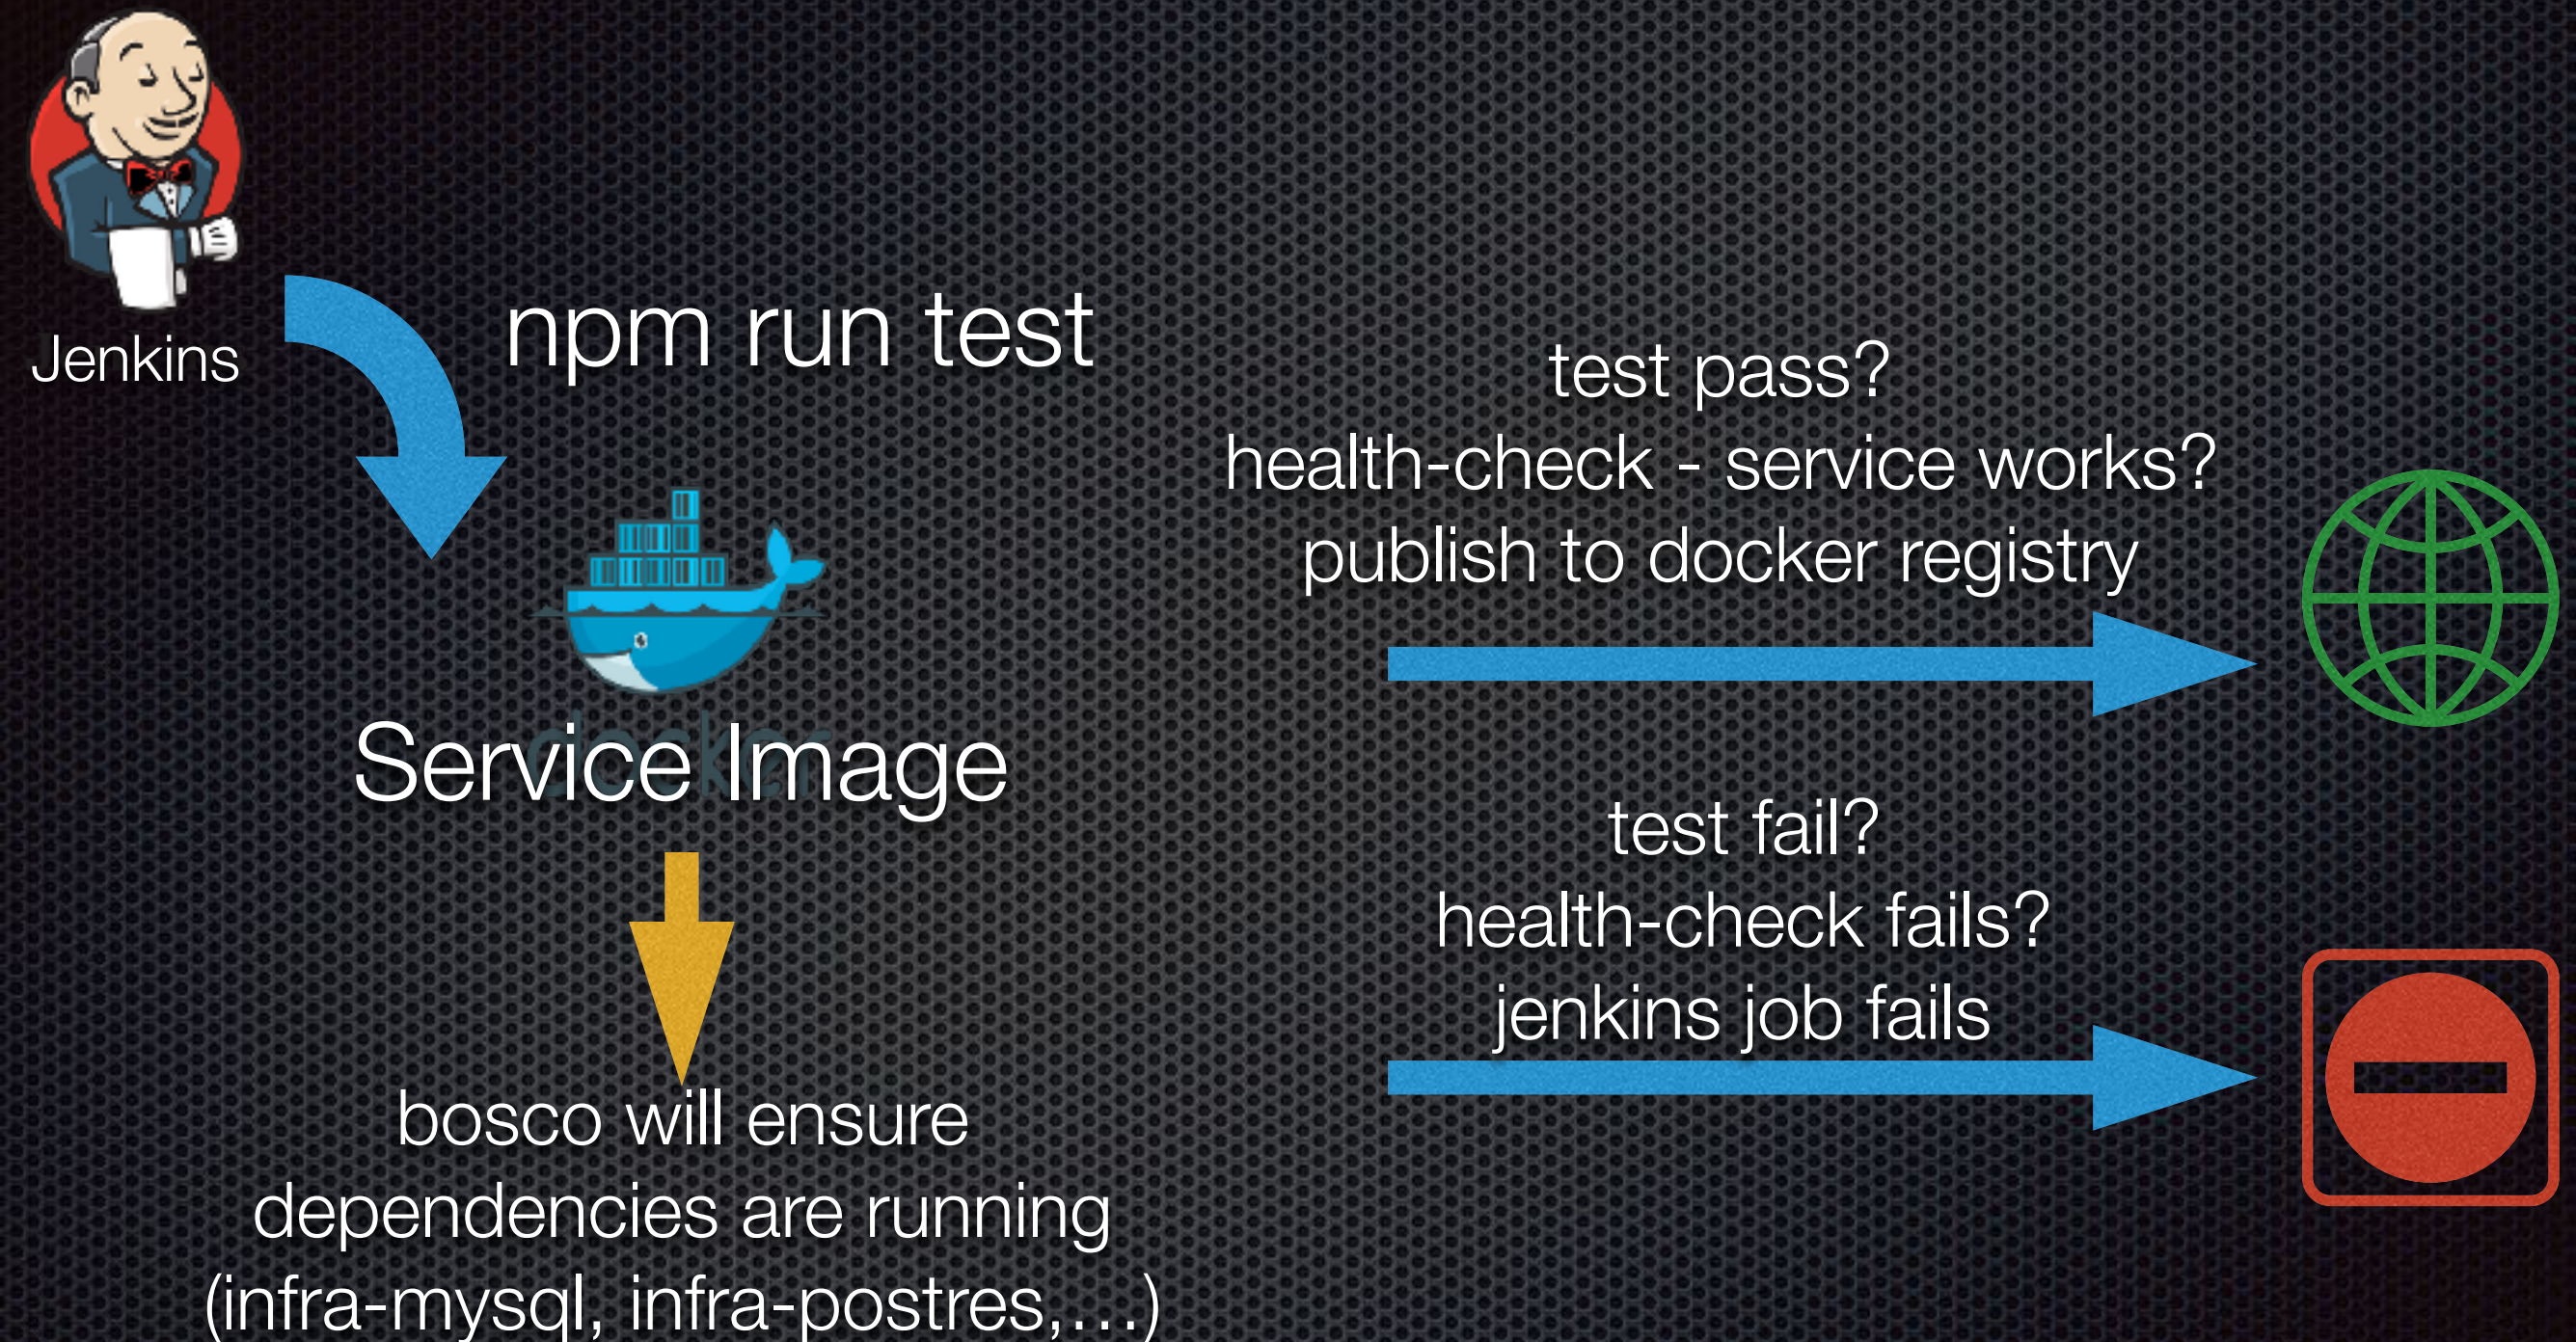

# The long journey of git push

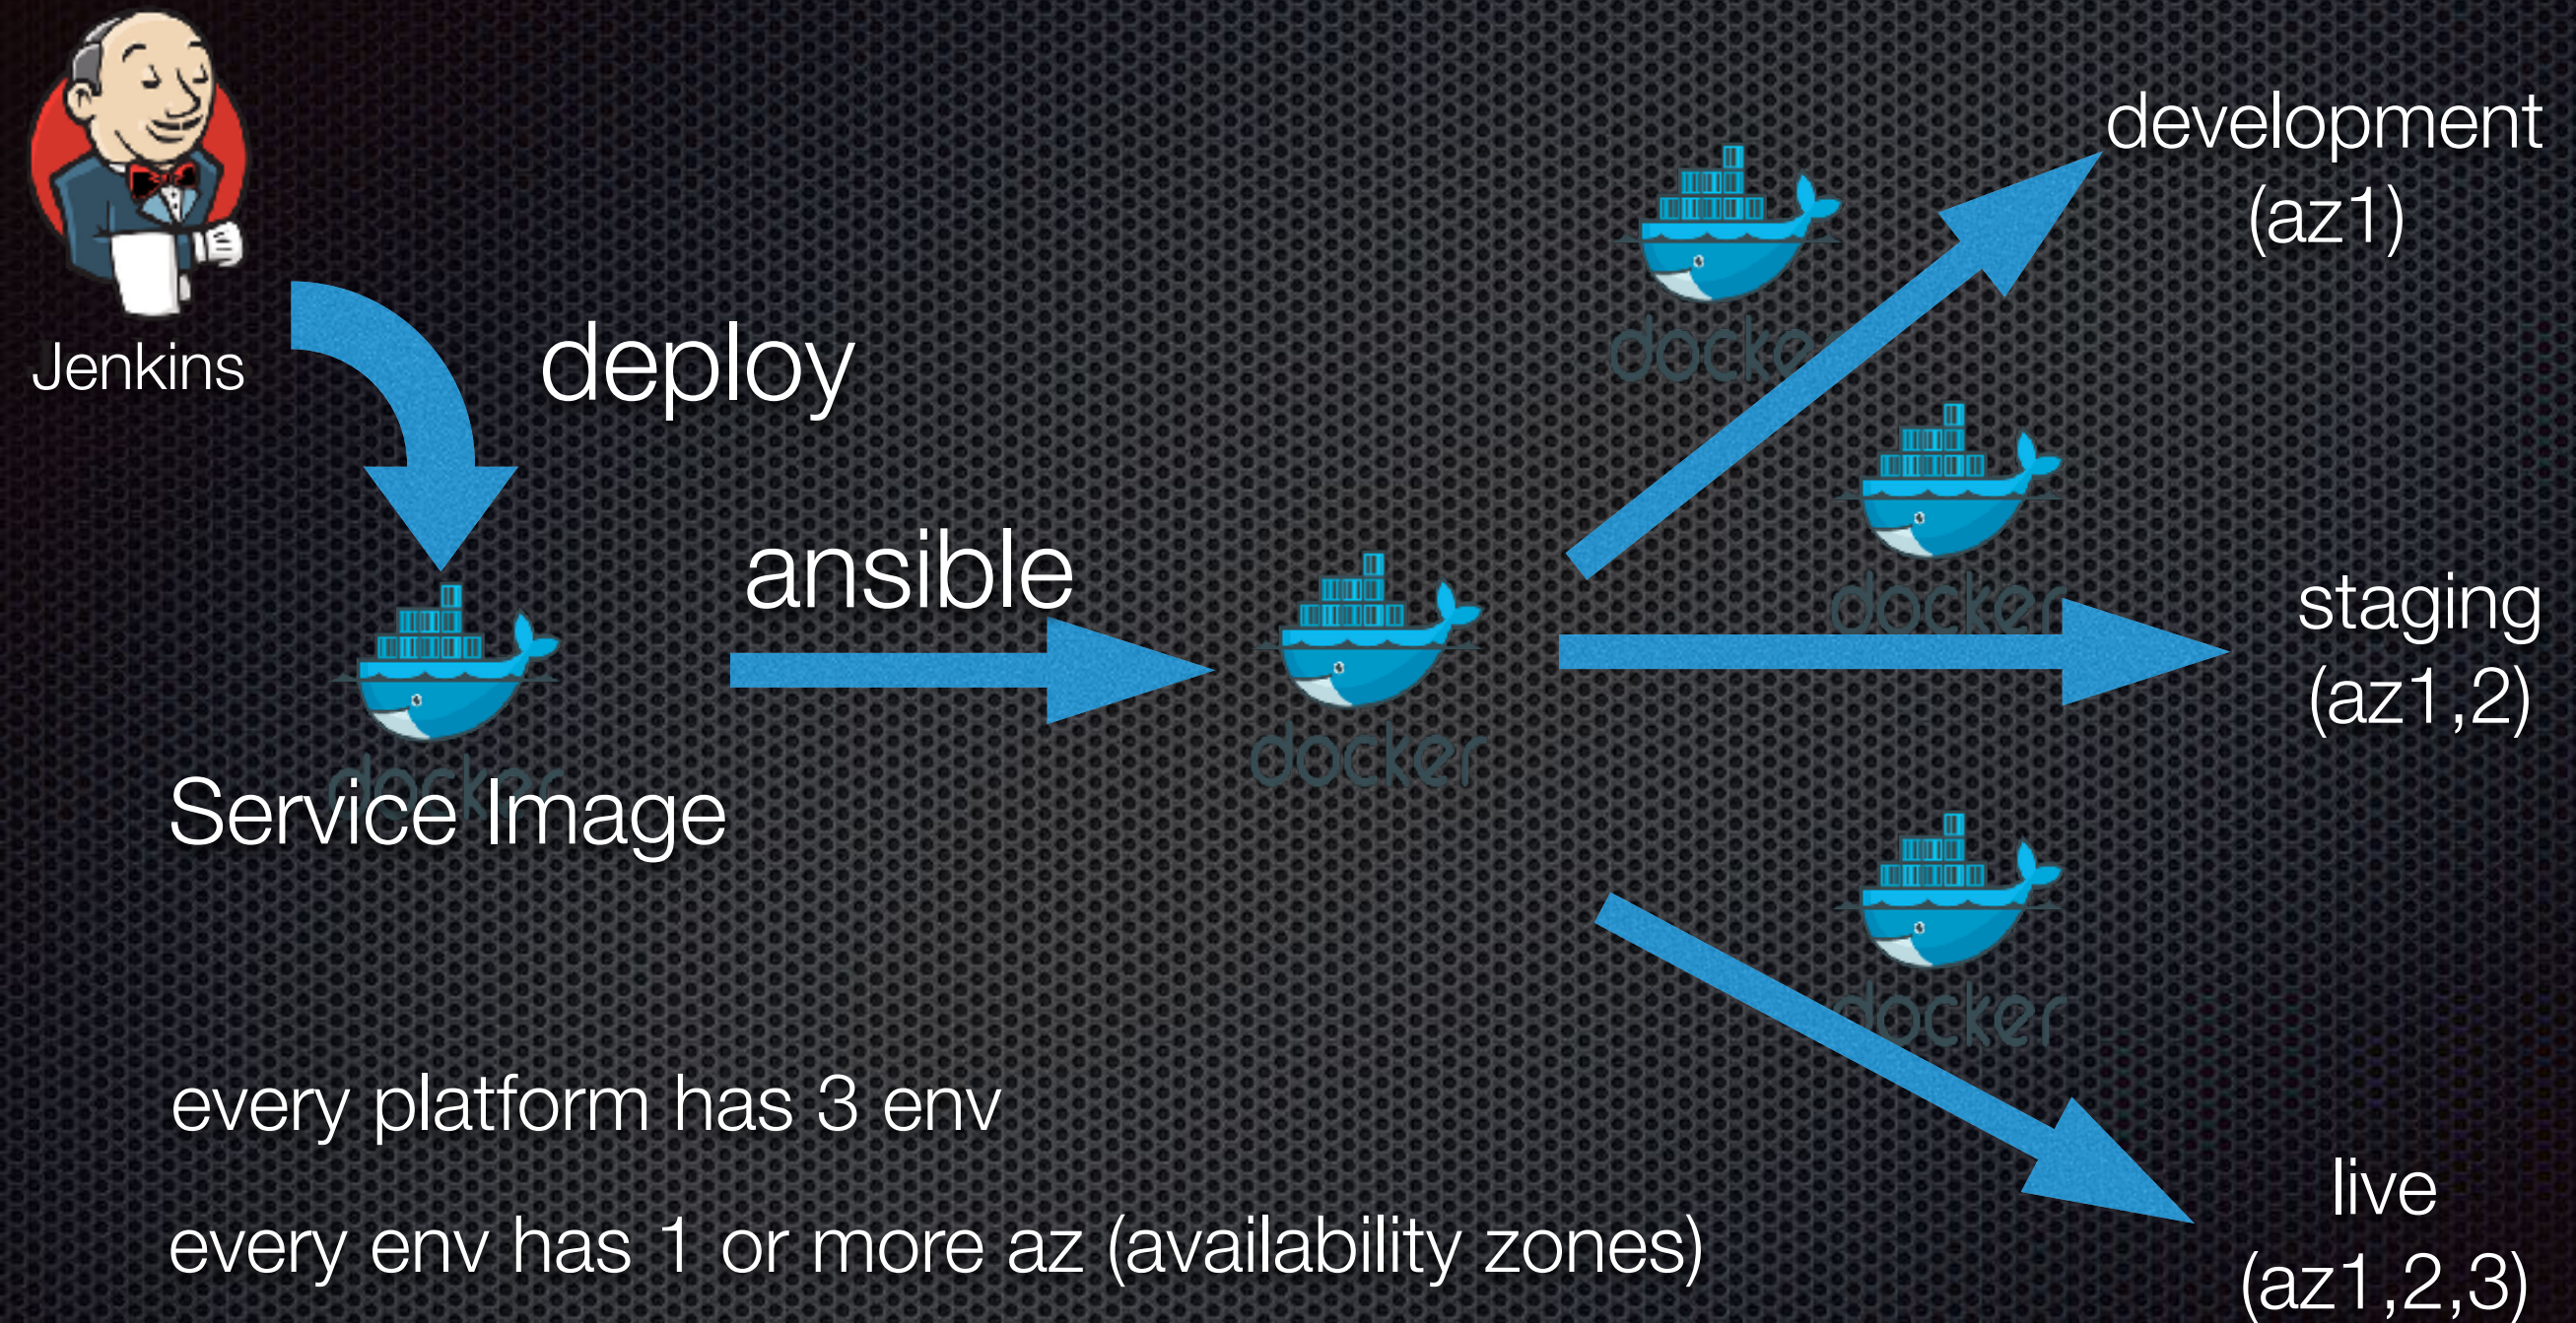

# The long journey of git push

# The long journey of git push

every platform has 3 env

every env has 1 or more az (availability zones)

eg: resources-platform01-az1.staging.tescloud.com

jobs-az3.live.tescloud.com

{{platform}}01-az{{1,2,3}}.{{env}}.tescloud.com

# How to debug?

SSH to the platform/env  
if unsure, look for platform in package.json

`tail -f /var/log/supervisor/service-name.err.log`

```
Display all 120 possibilities: (y or n)
fmaule@resources-platform-green01-az1:~$ tail -f /var/log/supervisor/service-resource-api.err.log
